ROOF SLOPE AND PITCH

\[
\text{Rise} \quad \text{Run} \quad \text{Span}
\]

Roof Slope is defined as: \( \text{Slope} = \frac{\text{Rise}}{\text{Run}} \)

Roof Pitch is defined as: \( \text{Pitch} = \frac{\text{Rise}}{\text{Span}} \)

\[
\text{Pitch} = \frac{\text{Rise}}{2 \times \text{Run}} = \frac{\text{Slope}}{2}
\]

\[
\text{Slope} = 2 \times \text{Pitch}
\]
