Instructions for completing the Federal/State Reporting Form for proposals

In order to meet reporting requirements on both the state and federal level, please help us properly categorize your proposal by answering a few questions. The information on this form is only used for impact reporting and is not intended to be an auditable form.

We are currently uses the following categories for all accountability reports concerning proposals.

Amount of proposal:
1. Please enter the total amount of the proposal
2. Then enter the sub-amount that is allocated to:
   a. Instruction
   b. AES/Research
   c. CES/Extension

Research and Extension are subdivided into additional categories. Please enter the percent of planned effort toward each of these sub-categories. These percentages must equal 100% for Research and Extension separately.

3. AES/Research (sub-categories)
   a. Plants
   b. Animals/Humans
   c. Environment

4. CES/Extension (sub-categories)
   a. ANR
   b. 4-H Youth
   c. FACS

Finally, we ask that you suggest a percent of your planned effort toward each of the Governor’s Goals. Percentages should equal 100%.

5. Governor’s Goals
   a. Growing GA
   b. Healthy GA
   c. Educated GA
   d. Safe GA

The following is a definition of each of the Governor’s Goals.

**An Educated Georgia**
Education is the means by which we develop Georgia's most important resource, her people. As we work to improve the quality of jobs for Georgians, education will be the foundation of success, both for individual Georgians and for our state as a whole. We are committed to providing every child in this state with an opportunity to learn and to ensuring that no child is left behind. We will set standards for learning and demand accountability for student progress. We
will show respect for teachers by listening to their recommendations and concerns and by giving them greater control of their classrooms. We will enhance local control of education by cutting burdensome bureaucracy and regulations, and giving local superintendents, school boards and parents more control over their community's education decisions. We are committed to excellence in our post-secondary education system and to fostering a culture of life-long learning. We will protect the HOPE scholarship, support adult learning and help our institutions of higher learning continue to produce quality graduates and world-class research.

A Safe Georgia
A fundamental duty of any government is providing for the safety of its citizens. All Georgians should feel safe on their streets, in their communities and in their homes. We will protect our society from violent, dangerous felons. We will provide our law enforcement community with the tools and the resources to detect and prevent crimes and to respond swiftly and effectively when crimes do occur. We will maintain a criminal justice system that can dispense justice swiftly and surely. And we will increase our coordination and readiness to protect our citizens from the threat of terrorism and to respond to natural disasters.

A Healthy Georgia
A healthy Georgia is a strong Georgia. We will encourage Georgians to adopt healthy lifestyles and make access to sound and affordable medical care available to every Georgian. We will pay particular attention to the quality of health and human services for our most vulnerable citizens, including provision of child protective services, and care for developmentally disabled citizens and those with mental health challenges. Georgia will lead the way in quality of life for senior citizens. We will open doors to more long-term care options and shift the state emphasis in long-term care from nursing homes to home and community-based settings. We will continue to battle substance abuse in our state. Through a combined awareness, treatment and law enforcement approach, we will fight for a drug free Georgia.

A Growing Georgia
Our state is blessed with great economic resources and competitive advantages that can create opportunity and prosperity for all Georgians. We are committed to being good stewards of Georgia's economy by practicing fiscal responsibility in state government and by maintaining a business climate that sustains our existing companies, attracts new business and jobs to our state, and empowers small businesses to grow and to create jobs throughout Georgia. We will train and educate Georgia's workforce to be well prepared for the job opportunities of the 21st century. We will extend our leadership in developing new technology resources and infrastructure and be aggressive in bringing economic vitality to rural Georgia as well as our cities. We must balance the demands of growing Georgia's economy with ensuring a good quality of life for our citizens. We will improve our transportation systems to reduce congestion and improve mobility, encourage development of livable communities, and protect our air, water, green space and other natural resources for current and future generations.
